

*Abstract:*

The unique candle cover will allow for an individual to create a personalized candle with his/her home computer and printer. The candle cover can be used for many applications such as but not limited to Memorial Candles, Baby Candles, Friendship Candles and Anniversary Candles. The candle software program will make the process of personalizing the insert card very straightforward. Then the personalized card can be slipped behind the candle covering to give it a “picture frame” effect. Creating a lasting keepsake for many years to come.
